ABDUL REHMAN QURESHI

AI Engineer | AI Automation & LLM Systems

Lahore, Pakistan | +923154233431 | arq5020@gmail.com

LinkedIn: linkedin.com/in/abdulrehman-qureshi | Portfolio: My-Portfolio

SUMMARY

AI Engineer who builds automation that takes manual work out of business processes. Designed and delivered a fully automated multilingual email agent for an electrical distributor in the GCC, carrying customer enquiries from first contact through to a priced quotation and a live payment link with no human in the loop. Also experienced in retrieval-augmented generation and applied deep learning.

CORE COMPETENCIES

- **AI Automation:** AI Agents, Agentic Workflows, Workflow Automation, Email Automation, LLM Integration, Prompt Engineering
- **Tools & Integration:** n8n, Python, REST APIs, Webhooks, FastAPI, Docker
- **AI/ML:** Retrieval-Augmented Generation (RAG), Natural Language Processing, Multilingual AI, LangChain, Hugging Face, PyTorch, TensorFlow

EXPERIENCE

AI Automation Engineer (Freelance) Dec 2025 – Sep 2026

Electrific, Islamabad, Pakistan (Hybrid)

- Delivered a fully automated email agent that took over inbound customer product enquiries end to end, removing manual reply work from a sales operation running across Bahrain and Saudi Arabia
- Enabled the agent to answer in the customer's own language and return a priced quotation complete with product images, specifications and a live payment link, so an enquiry could convert to a paid order without anyone stepping in
- Kept every quotation accurate against live stock and pricing by syncing the client's product catalog several times a day
- Automated the collection of supporting product data so the agent could still answer confidently on items with incomplete catalog records
- **Tools:** n8n, Notion AI, REST API integration, payment gateway integration

AI Software Development Intern Jul 2024 – Sep 2024

Buzzware Tech, Islamabad, Pakistan (On-site)

- Improved inference performance on the team's model serving stack, cutting the response time of deployed models
- Prototyped the team's first retrieval-augmented generation workflow, carrying it from document ingestion through embeddings and vector search to a working query demo
- Moved AI services onto containerised deployments, making releases repeatable across development and production

PROJECTS

Multilingual NexusRAG – Document Intelligence Platform

Python, FastAPI, LangChain, Hugging Face, Vector Databases, React, Firebase

- Built a RAG platform that lets users interrogate their own documents conversationally in Arabic and other languages, including full RTL rendering
- Shipped it as a working multi-user product with authentication, session persistence, and confidence scoring with source previews so users can see where an answer came from
- **Live Demo:** NexusRAG

DeepDeception – Deepfake Detection System

Python, TensorFlow, XceptionNet, Django, OpenCV

- Trained an XceptionNet deepfake classifier to 85.9% accuracy across a 53,400-frame test set and put it behind a public web interface anyone can test
- Selected for Artificial Intelligence Innofest 2024 and presented to industry evaluators
- **Live Demo:** DeepDeception | **GitHub:** deepfakeDetection

EDUCATION

Bachelor of Science in Artificial Intelligence Graduated: Jun 2025

Bahria University, Islamabad, Pakistan CGPA: 3.65/4.0

Dean's List for Academic Excellence, multiple semesters

Languages: English (Professional), Urdu (Native), Arabic (Basic) | **Availability:** Immediate, open to relocation
