ABDUL REHMAN QURESHI

AI/ML Engineer | LLM Specialist

Jeddah, Saudi Arabia | +966 57 847 6997 | arq5020@gmail.com
LinkedIn: linkedin.com/in/abdulrehman-qureshi | Portfolio: My-Portfolio
Seeking Sponsorship | Immediate Availability

PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer with specialized expertise in Large Language Model development, fine-tuning, and production deployment. Bringing 2 years of hands-on experience in LLM optimization, achieving 40% reduction in training time and building scalable AI systems using PyTorch, Hugging Face, and cloud infrastructure. Proven track record in deep learning, NLP, and computer vision with strong foundation in collaborative software development. Eager to contribute and learn with immediate availability and commitment to long-term growth.

CORE COMPETENCIES

- **AI/ML Frameworks:** PyTorch, TensorFlow, Keras, Scikit-learn, Hugging Face Transformers, LangChain
- **LLM Expertise:** LoRA/QLoRA Fine-tuning, Model Optimization, Prompt Engineering, Llama, GPT, Unsloth AI
- **Programming Languages:** Python, C++
- **Cloud & Tools:** AWS, Docker, FastAPI, Git, Google Firebase, CI/CD Pipelines
- **AI Domains:** Natural Language Processing, Computer Vision, Deep Learning, Neural Networks
- **Soft Skills:** Team Collaboration, Problem Solving, Adaptability, Cross-cultural Communication, Quick Learner

PROFESSIONAL EXPERIENCE

AI Software Development Intern July 2024 - September 2024
Buzzware Tech, Islamabad, Pakistan (On-site)

- Engineered scalable ML and LLM inference pipelines, reducing end-to-end model latency by 20% through TensorFlow optimization, mixed-precision training, and GPU acceleration strategies
- Contributed to early-stage Retrieval-Augmented Generation (RAG) experimentation, implementing document chunking, embedding pipelines, and vector similarity search for intelligent document querying
- Containerized AI services using Docker and optimized deployment workflows across development and production environments, improving reproducibility and system stability
- Collaborated with senior engineers on production ML system architecture, focusing on scalable API integration (FastAPI) and cloud-based model serving

KEY AI/ML PROJECTS

Multilingual NexusRAG - Real-Time Document Intelligence Supporting 100+ Languages
Technologies: Python, FastAPI, HuggingFace, LangChain, Firebase, React, Vite, SQLite, Vector Databases

- Architected and deployed production-grade Retrieval-Augmented Generation (RAG) system with HuggingFace Inference Providers, serving users with real-time document intelligence and conversational AI capabilities
- Implemented advanced RAG pipeline featuring dual retrieval modes (strict document-only and hybrid), confidence scoring, source transparency with chunk previews, and automatic document expiration for enhanced security
- Engineered scalable backend using FastAPI with Firebase Authentication, SQLite session persistence, and automated cleanup mechanisms, secure multi-user document management
- Built responsive React/Vite frontend with modern chat workspace UI including multi-session management, message branching, export functionality, and comprehensive document panel with upload/preview capabilities
- **Live Demo:** NexusRAG | **GitHub:** Private Repository

DeepDeception - AI Deepfake Detection System
Technologies: Python, Django, XceptionNet, TensorFlow, OpenCV, Cloud Deployment (Railway)

- Engineered production-ready deepfake detection system achieving 85.9% accuracy across 53,400+ video frames using XceptionNet architecture
- Built scalable Django REST API supporting 100+ concurrent users with consistent high availability on cloud infrastructure
- Optimized training pipeline using GPU acceleration on Google Colab P100 instances, reducing training time by 60%
- Implemented efficient inference techniques and model optimization for production environment deployment
- **Live Demo:** DeepDeception **GitHub:** deepfakeDetection Repository

SmartChat AI - LLM-Powered Conversational Assistant
Technologies: Python, Llama 3.2 (7B), Unsloth AI, Firebase, React, Natural Language Processing

- Fine-tuned Llama 3.2 7B model with custom prompt engineering strategies for domain-specific conversational applications
- Integrated Firebase Authentication and real-time database
- Applied advanced NLP techniques including sentiment analysis and context-aware response generation for enhanced user experience
- Achieved 92% user satisfaction score through iterative prompt optimization and continuous model refinement based on user feedback

EDUCATION

Bachelor of Science in Artificial Intelligence Graduated: June 2025
Bahria University, Islamabad, Pakistan CGPA: 3.65/4.0
Relevant Coursework: Deep Learning, Machine Learning, Computer Vision, Natural Language Processing, Neural Networks, Data Structures & Algorithms, Software Engineering

PROFESSIONAL DEVELOPMENT & ACHIEVEMENTS

- Deep Learning Specialization - Neural Networks and Deep Learning (Udemy, 2024)
- Artificial Intelligence Innofest 2024 - Presented DeepDeception project to industry professionals and evaluators
- Dean's List - Academic Excellence Award (Multiple Semesters, Bahria University)
- Actively pursuing AWS Machine Learning and cloud certifications to enhance professional credentials

ADDITIONAL INFORMATION

Languages: English (Fluent - Professional Working Proficiency), Urdu (Native), Arabic (Basic - Actively Learning)
Professional Attributes: Quick learner, culturally adaptive, team-oriented, result-driven, strong work ethic, detail-focused
Availability: Immediate (Ready to start within 1 week)
